## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by Yoo (KR0267212).

Re claim 1, Yoo discloses a coupling set for connecting a ground plate comprising: a first group of connection members and (11-1, 11-2, 11-3 for example) having an upper connection piece (11-2 for example) having a key protrusion (15a for example) formed on the upper portion thereof, respectively, and an upper connection groove (14a for example) having key groove (at 14a for example) formed on the respective lower portions thereof; and a second group of connection members (11-3 for example) having an upper connection piece having a key protrusion (15 for example) formed on the upper portion thereof, respectively, and at least one lower supporter formed in the respective lower portions thereof, wherein the ground copper plate (20) combined with a ground terminal (23 for example) mounted on mount seats (11b for example) of the connection members, so that the ground copper plate (20) is horizontally mounted.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yoo.

Re claim 2, Yoo substantially discloses a coupling set as set forth in claim 1 with the ground terminal (23) that comprises a lower fixing plate (unnumbered at the riveted portion for example), and an upper connector whose terminating portions are open (unnumbered at the end of 23 for example). Yoo does not explicitly disclose the middle bent portion of the ground terminal. However, it would have been obvious to modify the device of Yoo with different types of configurations since Applicants have presented no explanation that this particular configuration of "middle bent portion" is significant or is anything more than one of numerous configurations. A person having ordinary skill in the art would have found it obvious to modify the device of Yoo to the claimed configuration with a middle bent portion. A change in shape or configuration is generally recognized as being within the level of ordinary skill in the art. *In re Daily*, 149 USPQ 47 (CCPA 1976).
